

# Unlock the next level of process automation with Agentic AI

**Technology is transforming more rapidly than ever before. AI can unlock efficiency, improve decision-making, and enhance experiences – but where do you start?**

Getting started can be simple: start with your current processes. Agentic AI can handle tasks that couldn't previously be automated because it was too nuanced or unstructured for automation, like rules or bots. And it can fit within your human-centric process flow, leaving control where it belongs - with your business.

## Deliver Impact Today & Create the Path Forward

The BIG Agentic AI Kickstart is a short custom engagement designed for companies to unlock the potential of Agentic AI in a structured, practical way.

### Engagement Overview

- ☒ 4- 6 Week Engagement
- ☒ Real Use Cases
- ☒ Measurable Outcomes
- ☒ Leveraging platform security, devops & governance

**Let's Get Started...**

- 1**

**Select from Opportunities**

You have ideas, we have expertise to help you select the best fit use cases.

**2**

**Rapid Design & Development**

We build an agent or agents for your use cases with your requirements and feedback.

**3**

**Agentic AI in Action**

Your agent can be piloted so you can learn the potential of agentic AI & scale to other use cases.

*Agents are best fit for automation that requires contextual understanding, reasoning, conversational or personalized interaction, document ingestion or summarization, decision-making, and content creation.*

## Common Use Cases for Agentic AI

Operations Agents	Document & Content Agents	Compliance Agents
Intelligent Case Initiation & Follow-Up	Internal Knowledge Curation & Surfacing	Context-Aware Compliance Checks
End-to-End Ticket Resolution	Contract Lifecycle Assistance	Due Diligence & Risk Rating
